PROJECTS | ACHIEVEMENTS | SKILLS | TRAINING | EDUCATION | EXPERIENCE | INTERESTS | NETWORKS

I am a DevOps consultant with almost ten years of experience as a sales consultant and successful time as an entrepreneur and chef. I also have over five years of experience in adopting DevOps methodologies for Enterprise clients. I am focused on agile ways of working with an emphasis on communication and transparency. I believe in using the right tool for the job and worked with a variety of modern DevOps tools to achieve painless regular deployments.

PROJECTS

Harness (November 2023 - now)

Working with multiple UK and EU based customers assisting with onboarding and adoption of Harness products. Mainly focused on CI/CD/IDP with responsibilities including, architecture design, workshops with customer teams, advice on integration with existing toolset and best practices.

Tech stack: Harness, Terraform, Kubernetes, Spinnaker, AWS, GCP, Azure, OpenShift

RBS/Natwest via ECS/GlobalLogic (February 2021 - November 2023) - Cloud Adoption (AWS Shared Services)

Project focused on delivering AWS services to mainly internal customers with an emphasis on security, compliance and best practices. Over time I was involved in various initiatives tackling the challenges of a Hybrid Cloud within a large Enterprise. I had an opportunity to be involved in the whole process of delivering solutions in the cloud (AWS) in a highly regulated environment. From the requirements gathering, through architecture design, and security assessment to implementation and production deployment. I worked closely with engineers from AWS and Hashicorp. I also provided my expertise to various Third Party vendors to help them integrate with our solutions.

Tech stack: AWS, Terraform Enterprise, Kubernetes(AWS EKS), TeamCity, Python, Prometheus/Grafana, Istio, Splunk, Vault

RBS/Natwest via ECS/GlobalLogic (January 2021) - CaCtus

Controls as Code project which I joined as the temporary replacement was focused on delivering controls to the AWS organisation ensuring that accounts are adhering to the Security and Compliance standards established in the bank. I was developing custom AWS Config rules, SCPs and ensuring smooth releases.

Tech stack: AWS, Terraform Enterprise, Python, TeamCity

RBS/Natwest via ECS/GlobalLogic (March 2019 - December 2021) - Mimo

During this engagement, I was part of a wider DevOps team on an innovative Big Data project powered by machine learning and AI. Our team was responsible for infrastructure delivery and management, ongoing support for the developers, managing internal services as well as stakeholder management.

Tech stack: AWS, Terraform(Community), Jenkins, OpenVPN, Microsoft AD

Tracr via ECS/GlobalLogic (February 2019)

I was working on database provisioning automation and its integration with the existing pipeline for a startup using blockchain to store data about diamonds.

Tech stack: Rancher, Gitlab pipelines, AWS (RDS), Postgresql, Golang

ACHIEVEMENTS

- In January 2020 I became a leader of the DevOps playground Meet-up see [Meetup page](#)
 - Organised and presented the first online edition of the event in response to the COVID-19 pandemic
 - Automated lab infrastructure creation and delivery (Terraform Cloud, AWS, GraphQL API)
 - Established a support system for the presenters
 - Successfully handed over the leadership (2023), continuing to provide technical support
- Delivered multiple sessions at the DevOps playground (content and lab infrastructure design, presentation)
 - Container orchestration with Docker Swarm and Kubernetes (London, Edinburgh and online) - see on [YouTube](#)
 - Building cost-efficient infrastructure in Cloud (AWS) using Terraform (online) - see on [YouTube](#)
 - Docker and Podman - twins, rivals or strangers? (London, online) - see on [YouTube](#)
 - Introduction to IaC with Terraform and Minecraft (London and online) - see on [YouTube](#)
- Delivered talk at Docker Meetup in Edinburgh - Deploying Microservices with EKS/Kubernetes (Meet-up page)
- Finalist of DevOps Industry Awards 2020 - Newcomer of the Year - see more details
- Guest on Tech³ Podcast episode 11 DevOps Playground - Listen Notes, Apple Podcasts, Spotify

SKILLS

Type	Advanced	Intermedaite	Beginer
IaaS	Terraform	CloudFormation	N/A
Cloud	AWS	Azure	GCP
Containers/Orchestration	Docker	Kubernetes/EKS	Rancher
Coding/Scripting	N/A	Python, Bash	Ruby, JavaScript, Golang
Configuration Management	N/A	Ansible	Bolt
CI/CD	Harness	Jenkins, Teamcity, Gitlab	Travis, Spinnaker
Monitoring	N/A	Prometheus/Grafana	Istio, DataDog
Service Mesh	N/A	Consul, Istio	N/A
Secrets Management	N/A	Vault	N/A

EDUCATION

Makers Academy (March 2018 to June 2018)

- Pair programming / Group projects, Object-oriented programming, TDD & BDD, XP values, Agile programming

Wroclaw University (October 2009 - September 2012)

- Economics with a focus on Financial Markets

EXPERIENCE

Years	Role	Company
2023 - now	Solutions Architect	Harness, EMEA, London
2018 - 2023	DevOps Consultant	ECS, GlobalLogic UK&I London
2016 - 2018	Insurance Consultant	A - Plan Insurance, London, Luton
2014 - 2016	Chef, Co-Founder	Celinka, Poland
2011 - 2013	Senior specialist in Complicated Receivables Department	Ultimo Ltd. Poland
2010 - 2011	Inspector, Team leader in Central Eviction Department	Ultimo Ltd. Poland
2009 - 2010	Consultant, Investment Advisor	Renaissance Capital Ltd Poland

INTERESTS

Yoga, Cooking, Video Games, Lego, Hiking/mountaineering, Travel, Art/Fashion
